ENERGY & TECHNICAL SERVICES CONFERENCE

This annual event covers the most pressing energy-related issues and the latest innovations, including the state of the energy market; building “green” supermarkets; equipment and energy purchasing strategies; refrigeration; maintenance; HVAC/R design; commissioning and lighting-system productivity and efficiency. Store tours and manufacturer/retailer exchange sessions cover the newest product developments.

TARGET AUDIENCE

Professionals involved in and responsible for refrigeration, construction, engineering, maintenance, energy management, environmental issues, equipment purchasing or operations- and utility-costs control.
