Salmofan (variations of the different coloring of the salmon) –

All text on the Salmon Spec form in **Orange** mean they have hover over text. When hovering your mouse over the orange words, a text bubble will appear explaining the wording in better detail.

Examples of defects (Fillets)

Defect	Example Photo
Meat Color < 22 on Salmofan	

<p>Melanosis</p>	 <p>A close-up photograph of a salmon fillet showing signs of melanosis, which are dark, irregular spots on the surface of the fish. A ruler is placed below the fillet for scale, showing markings from 0 to 10 centimeters. The text "El SalmoFan™ Lineal tiene los mismos colores del" is visible on the ruler.</p>
<p>Gapping</p>	 <p>A close-up photograph of a salmon fillet showing gapping, which is a separation of the muscle fibers. A ruler is placed below the fillet for scale, showing markings from 0 to 12 centimeters.</p>
<p>Cracking</p>	 <p>A close-up photograph of a salmon fillet showing cracking, which is a dry, flaking surface. A ruler is placed below the fillet for scale, showing markings from 0 to 12 centimeters.</p>
