Executive Summary	9
Introduction	9
Methodology.....	10
Food shopping at a glance	11
Preface: Evolution of Key Macro Trends.....	12
Demographics	13
More Americans live in multigenerational households.....	15
Conventional households supported conventional eating rituals.....	16
We are becoming more ethnically diverse.....	16
Economics	17
Technology reshapes the locations where we live and eat	18
Chapter 1: State of the Marketplace	19
Rethinking the primary store.....	21
Growth opportunities may lie in the middle ground between food retail and food service.....	23
Fresh-oriented categories continue to gain relevance within the store	25
E-commerce is still nascent for groceries.....	26
Digital technologies shape planning of meals and trips	28
Chapter 2: Shift to a Shared Shopper Paradigm	29
Primary shopping no longer works well as a framework.....	31
More people claim to be Primary shoppers than there are households in the U.S.	32
Men now shop, too. No, really, they do.	32
Couples have differing perspectives on how to describe their shopping	33
Trip missions have narrowed, and so has the shopper’s vision.....	34
The shift to sharing arises from lasting societal changes.....	36
Men contribute more to cooking	37
Food prep roles drive food shopping roles.....	37
A Shared shopping perspective reveals new opportunities	39
Trips to the store are better understood at the household level	41
When grocery shopping is delegated or shared, shoppers tend to underreport their household’s spending.....	42
Complex variety of household food strategies means “new” shoppers aren’t all alike	43

Non-Primary shoppers face challenges when confronted in-store with unplanned opportunity or complexity	45
Shared shoppers can specialize by category, eater or occasion	47
Chapter 3: Mealtime Today.....	49
U.S. consumers need and want to eat better	50
Consumers trust food retailers to be their wellness allies.....	51
Reimagining the family meal occasion	52
Family meal success depends on several factors, with multiple places to engage.....	53
Different stages of family formation display different opportunities for retailers.....	54
Families with kids lean on fast food despite their belief that restaurants hinder their wellness goals.....	55
A focus on discoveries and culinary skill building can help align family meal success with life stage needs and priorities	56
Chapter 4: Shopper Values and Trends	57
Health and wellness has become proactive and self-assessed	58
Eating has become more flexible and customized.....	59
Consumers engage in specialized dietary approaches to address personal wellness priorities and/or culinary exploration	60
Low awareness of shelf labeling programs has limited their helpfulness for shoppers	61
Fresh, less processed foods remain the dominant path to health and wellness.....	62
GMO avoidance is currently more about minimally processed foods than about health.....	63
A growing number of shoppers intentionally avoid GMOs	64
Widespread interest in GMO labeling is more about labeling, less about GMOs specifically.....	65
Food safety and responsibility along the food supply chain.....	66
Shoppers generally trust food retailers to provide safe food	67
Shoppers have a variety of concerns when it comes to the safety of their food; perceived risks vary somewhat with age.....	68
Shoppers utilize multiple sources for information on food safety standards and recalls	69
Sustainability	71
Shoppers want to support companies that prioritize treatment of workers and animals, even above low prices	72
Shoppers want food retailers to prioritize animal welfare over environmentally sustainable practices	73
Appendix: Tables.....	74
